

## **RESOL Japan at Tokyo trade show**

Tokyo, 03 August 2009

IFCJ KK Ecolifelab of Tokyo, Japan, specializing in energy autonomous architecture, and distributor of RESOL solar thermal controllers in Japan, exhibits at the Japan Home & Building Show in Tokyo, November 11-13, 2009 .

The exhibition is part of the “Energy Conservation House Project” and focuses on solar thermal energy for homes and buildings.

IFCJ KK Ecolifelab uses solar thermal and heating devices manufactured by RESOL of Germany as components of residential and commercial zero carbon energy solutions.

“This exhibition is the right context to show the potential of solar thermal to key persons in the construction industry”, commented Dr Oskar Bartenstein, manager in charge of RESOL Japan. “Japan has lots of sunshine and a huge CO<sub>2</sub> problem. We have the electronic brains to drive the solution.”
